

Florida DOH Confirmed COVID-19 Cases (Through April 9, 2020)

This chart shows the ongoing total of all the DOH confirmed cases in Florida as well as other areas of comparable size and significance in efforts to contain the pandemic. The data is displayed with lines for comparison with one, three, five, seven, and thirty day doubling time models. The chart also uses a log scale consistent with other graphics produced in research and respected media sources. Day 0 represents the first day the total cases reached 100.

Populations: Florida ~ 20 million, New York City ~ 8 million, South Korea ~ 50 million, Italy ~ 60 million

Florida Data collected from: <https://fdoh.maps.arcgis.com/apps/opsdashboard/index.html#/8d0de33f260d444c852a615dc7837c86>.

International Data collected from John's Hopkins University and New York City Data collected from NYC Dept. of Health
