

Florida DOH Confirmed COVID-19 Cases (Through April 9, 2020)

This chart shows the ongoing total of all the the DOH confirmed cases in Florida stratified by counties in major population centers. Day 0 represents the first day total cases in each county reached 1/100,000 residents.

The values are represented as population adjusted rates for easy comparison between larger and smaller areas.

The data is displayed with lines for comparison with one, three, five, seven, and thirty day doubling time modles.

This chart uses a log scale consistent with other graphics produced in research and respected media sources.
